AECHMEA bracteata, large grower, lasting red bracts	
caudata variegata, lvs. striped cream & green, orange fl.	1.50
chantinii, large grower, rare, gray bands on green	8.50
fasciata, silvery-banded lvs., long-lasting pink bracts, sm.	1.50
x Foster's Favorite, shiny red-maroon lvs., red inflor.	1.00
fulgens discolor, green lvs., purplish reverse, red infl.	1.50
miniata discolor, similar to fulgens, more cold-resistant	1.25
orlandiana, chocolate zigzag bands on green, yellow infl.	1.50
tessmannii, large grower, broad bronze lvs., pink infl. sm.	2.50
Billbergia amoena, gray-green tubular plant, pink bracts	1.00
euphemiae, similar to preceding	1.00
leptopoda, 'permanent-wave plant', curled lf. tips	1.00
nutans, 'friendship plant', small grower, narrow gray lvs.	.75
pyramidalis, broad lt. green lvs., bright red inflor.	1.00
pyramidalis var., silvery lvs., bright pink inflor.	1.50
saundersii, tubular, lvs. green spotted ivory & rose	1.00
species, like preceding but taller-growing	1.25
BROMELIA balansae, large grower, spiny, 'heart-a-flame'	med. 5.00
GUZMANIA lingulata minor, lt. green lvs., red center	med. 2.50
monostachia tricolor, lt. green lvs., erect pinkish infl. sm.	2.00
vittata, cross-banding of maroon on light green	2.50
HOHENBERGIA stellata, large grower, lt. green lvs., red infl.	3.50
NEOREGELIA marmorata, lt. green marbled maroon, lavender fls.	1.25
ampullacea, small-growing, lvs. banded red-green	1.25
mooreana, new species, recurving green lvs., purple spines	2.50
spectabilis, beloved 'painted fingernail plant', red tips	1.25
zonata, similar to ampullacea but broader lvs.	1.25
TILLANDSIA fasciculata, narrow gray lvs., reddish spike	1.25
lindenii, narrow green lvs. striped maroon, flat pink spk.	3.50 small
paramensis, small-growing, dk. gray-green lvs., pink inflor.	1.50
VRIESIA carinata, lt. green lvs., flat spike of red & yellow	2.50 med
gloriosa, flattened red spike, yellow fls., broad gr. lvs.	2.50 small
x 'Mariae', robust version of V. carinata	med. 2.50, lg. 4.50
splendens major, lvs. green striped brown, 'flaming sword'	5.00
BILLBERGIA saundersii hybrids, tubular, bronze-pink effect	1.00

BRIEF CULTURAL NOTES. Leaf coloration is best developed in strong filtered light. Avoid full sunlight in most cases. Temperature tolerance ranges from the low thirties to extreme summer temperatures. The potting medium preferably is highly porous, whether it be osmunda fiber, shredded tree fern, orchid bark, or some mixture of granite chips, coarse sand and German peat. Most bromeliads will promptly rot in a medium that is poorly drained. Drench plants and pots with a soluble balanced fertilizer prepared as for orchid plants, no stronger. Keep centers of plants filled with water. Water pots about once a week. Liquid Malathion (use dilution for scale insects) will control scale; invert plants to drain off excess spray.

IMPORTED BARE-ROOT ORCHID PLANTS are presently available as follows: Epidendrum cochleatum, E. Mariae, @ 2.25. E. nemorale, @ 3.50. Laelia anceps, 1.50 to 3.50, depending on size. Oncidium celebata, 1.50. O. Sphacelatum, out of pot, 3.50 to 5.00.

ORDERS OF \$5.00 OR MORE will be sent postpaid. Please add 35¢ on smaller orders. Orders will be shipped as weather permits, especially during the winter months. Please be patient.
